Practical Economy

Baking powders made from alum or phosphate may be bought for a trifle less than Dr. Price's Cream Baking Powder, which is made from cream of tartar, derived from grapes.

Alum powders are not only cheap, but they differ greatly in leavening power.

If a cheap baking powder is used for a fine cake and the cake turns out a failure there is a waste of costly materials worth more than a whole can of the cheap baking powder.

Dr. Price's Cream Baking Powder produces the finest food, and its use, therefore, results in an actual saving.
